Machinery*

Super-Lathe®

Since 1957

The *Super-Lathe®* represents the ultimate in performance for heavy lathes in the steel industry around the world. These machines last extremely long with minimum maintenance. Intended for steel mills, roll foundries and forge shops, these rugged precision roll lathes find use in turbine rotor, large shaft and bar production. We also make other roll shop machines, as well as special machinery for many metal cutting applications. Only Binns Machinery Company will offer guarantees of life, productivity, and accuracy for 10 years.
